1. **Purpose**

The Virginia Tech Department of Athletics is concerned about the use and abuse of drugs and alcohol. The abuse of chemical substances (including diuretics and masking agents) is not permitted. This includes the misuse of prescription and over the counter drugs, the use of androgenic anabolic steroids, the use of alcohol, the use of drugs that are not medically indicated, and the use of illegal drugs. These pose a serious threat to the growth, development, and overall physical and mental well being of our student-athletes.

The Department of Athletics is concerned that direct drug side effects (e.g. the drug might cause a heart attack if used during the time of training) may cause serious injury to student-athletes and, in team sports, to their teammates and opponents. It is our philosophy and policy to help student-athletes help themselves with regard to the use of illicit drugs, prescription medication, and inappropriate use of over the counter drugs (e.g. medication should be taken as prescribed and directed). The Department of Athletics is also concerned about overuse or abuse of alcohol. In order to address these concerns, the Substance Abuse Committee has been established. The Committee is appointed by the Director of Athletics. The Office of Student Life in the Athletic Department is responsible for providing substance abuse education.

2. **Policy**

The Virginia Tech Department of Athletics does not approve of, excuse, or condone the use and/or abuse of illegal drugs (e.g., marijuana, speed, LSD, barbiturates, cocaine, ecstasy, heroin, PCP, GHB, etc.) by student-athletes. The use of such drugs can (1) be harmful to the individual; (2) affect athletic performance; (3) negatively affect the performance of the team; and (4) put the individual and members of the individual’s team in danger. The use of drugs can, among other things, lead to problems in many areas of ones life: poor academic performance; poor
athletic performance; relationship problems, etc. Some of the signs of problematic drug use include: lack of motivation (especially with marijuana), lethargy, not going to class regularly, agitation or nervousness, short temper, difficulty with sleep, loss of appetite, violence, loss of friendships, decline in grades or athletic performance. Another sign of problematic drug use is the need to do the drug on a frequent or regular basis (e.g., using marijuana daily) and/or not being able to do without it. Such “addiction” may be due to physical reasons, psychological reasons, or both.

Student-athletes who use drugs often do not fit the stereotype of a “drug abuser” or “addict.” However, all student-athletes, even if not “addicted,” have experienced or will experience problems in their lives due to drug use. It is important for student-athletes to know the signs of problematic drug use and to realize that the use of any illegal drug or the abuse of any drug is considered a violation of the drug policy.

3. Procedures

3.1 Substance Abuse Education

Education is the most valuable tool in the life long prevention of substance abuse. The Office of Student Life is committed to their responsibility in the area of education. Examples include but are not limited to:

1. Arranging speakers and seminars for coaches and staff in order for them to be more familiar with areas of drug abuse, such as how to identify an abuser, how to help an abuser, and risks of drug abuse.
2. Programs provided for student-athletes, such as educational and motivational speakers that will provide the necessary information to enable student-athletes to make decisions that will enhance a healthy lifestyle.
3. Disseminating information and materials available from NCAA, campus, and community resources in the areas of drugs, including alcohol and tobacco, as well as materials related to general health and well-being.
4. Providing opportunities during preseason meetings for student-athletes to discuss health, legal, and ethical risks of alcohol and other drug use.

3.2 Drug Testing

This program is required of all student-athletes including scholarship and non-scholarship student-athletes. All student-athletes are required to participate in the drug testing program as long as they are associated with the Athletic Department.

3.2.1 NCAA Drug Testing Program

The NCAA requires student-athletes competing in NCAA championships to be drug-free. Effective since August 1, 1990, a student-athlete who is found to have utilized a drug from the NCAA Banned Drug List is to be declared ineligible for all regular season and postseason competition through the time period ending one calendar year after the positive drug test. Also, effective since August 1, 1990, testing for steroid use has been conducted on a year-round basis.

The NCAA drug-testing program involves urine collection on specific occasions (usually, NCAA championships, on-campus previous to football bowl games, or on other occasions for selected football and track athletes). The urine samples undergo laboratory analyses for substances on a list of banned drug classes developed by the NCAA Executive Committee. This list consists of substances generally purported to be performance enhancing and/or potentially harmful to the health and safety of the student-athlete. The drug classes specifically include stimulants (such as amphetamines and cocaine) and anabolic steroids, as well as other drugs.

A consent form, prescribed by the NCAA Management Council, is administered individually to student-athletes each academic year at the time that the squad first meets. Failure to sign the consent form shall result in the student-athlete’s ineligibility for practice or competition. The consent form is kept on file in the Compliance Office.
for the Director of Athletics. Detailed information on the NCAA Drug Testing Program is on file in the office of the Director of Athletic Training.

### 3.2.2 Virginia Tech Athletic Department Drug Testing Program

Virginia Tech and the Department of Athletics believe that alcohol and drugs have no place in intercollegiate athletics participation. The Department of Athletics has developed the Substance Abuse Program, which is designed to promote the physical and mental health of its student-athletes while protecting their individual rights to privacy. The program is administered by the Substance Abuse Committee, which is composed of representatives from the Cook Counseling Center and Athletic Department personnel.

The comprehensive program consists of random testing as well as for improper drug use on the basis of reasonable suspicion or in response to a voluntary request from a student-athlete or a request by the coach. In addition, the program emphasizes education and preventative programs and counseling.

The policies and procedures for the testing are reviewed and revised yearly by the Substance Abuse Committee and approved by the University Legal Counsel. They are distributed to all coaches and athletes.

Each student-athlete will be made aware of the consequences involved if he or she violates the rules established by the Committee and abuses chemical substances. All coaches are responsible for knowing the policies and procedures and for educating the student-athletes regarding the disciplinary actions that will be taken if they test positive.

Each head coach is responsible for distributing the “drug testing cards” for random testing. (The head coach may appoint another staff member for actual distribution, but the head coach is ultimately responsible.)

Each fall, all student-athletes attend a mandatory meeting, which reviews current drug testing policies and procedures and culminates in the signing of the Consent to Testing Form (different from the NCAA form). This form is kept on file in the Compliance Office. According to Athletic Department policy, a student-athlete cannot practice or compete if he or she fails to sign the form.

All coaches involved in recruiting should advise the prospective student-athlete of the drug-testing program during the recruiting process. Coaches are expected to support the efforts of the Department of Athletics to insure that the athletics program is drug-free and that Virginia Tech student-athletes are informed of the risks involved in drug use. Coaches’ regular contact with student-athletes provides an excellent opportunity to counsel and educate. They are assisted in this effort by other departmental and university staff members.

### 3.2.3 Drug Testing Procedure

Testing will be conducted throughout the year (in season, out of season, and summer school). Testing takes a variety of forms:

1. Random individual test – student-athletes’ names are computer generated and each receives a card which requires him or her to be tested with the day and time noted on the card;
2. Team testing – a team may be immediately tested before or after a workout or practice without notice;
3. Testing for reasonable suspicion – can be with or without notice;
4. Coach may request an individual or team test with or without notice when there is reasonable suspicion.

The testing site is 112 Merryman Center. The site is open from 6:30 a.m. to 9:00 a.m. to allow time to report without interfering with classes or other scheduled activities. Each student-athlete must produce a minimum 25 ml of urine for a routine test and 50 ml for a steroid test. All individuals taking prescribed or over the counter medications have the responsibility of notifying the crew chief at the testing site.
The computer generates the names of student-athletes to be tested. The Director of Athletic Training completes an appointment card (see Table 1) for each student-athlete and delivers them to the head coach to be distributed to the student-athletes.

</tbody>
</table>
Failure to show up, being late or not giving a sample will be treated as a positive test result and the individual may receive sanctions and penalties at the discretion of the Committee.

To ensure validity, each specimen will be obtained under direct supervision. Security of the specimen (chain of custody) will be implemented from the moment the student-athlete signs in until final completion of analysis of the specimen at the laboratory. Positive results, whether they are positive urine test or no-shows/no-voids, are communicated from the testing agency to the Chair of the Substance Abuse Committee. The Director of Athletic Training will also be copied by the testing company.

In cases where student-athletes are found to be using drugs or are in non-compliance with collection procedures, a letter will be sent notifying them of the specific problem and informing the student-athlete of a meeting with the Substance Abuse Committee. Copies of the letter are sent to the head coach. In all cases, the individual must appear before representatives of the Substance Abuse Committee for the purpose of answering questions and presenting additional information. The student-athlete may request the presence of his or her coach. After the meeting between the student-athlete and the Substance Abuse Committee, the student-athlete will be placed in Phase 1, 2, 3, or 4 and notified of such by letter. In cases such as no-shows or no-voids, the Substance Abuse Committee may or may not place the student-athlete in any of the four phases of sanctions. In any case, the Committee will require more frequent future testing. Sanction procedures (Phases 1 through 4) are described in Sections 3.5.1 through 3.5.4 entitled Recommended Guidelines. A chart summarizing the penalties is shown in Table 3 (below). Sanctions or Phases range from regular counseling to loss of participation.

VIRGINIA TECH ATHLETICS SUBSTANCE ABUSE PROGRAM

PENALTY SUMMARY
3.2.4 Drugs Subject to Testing

The Virginia Tech Department of Athletics program tests for substances on a list of banned-drug classes developed by the department and the NCAA. A sample list is shown below in Table 4. A detailed list is available upon request from the Sports Medicine Staff, the Athletic Department Office of Student Life Staff or the Chair of the Substance Abuse Committee. This list consists of substances generally purported to be performance enhancing and/or potentially harmful to the health and safety of the student-athlete. The drug classes specifically include stimulants (such as amphetamines, ecstasy, and cocaine), hallucinogens (such as LSD), anabolic steroids (such as Anavar and Dianabol), diuretics, masking agents, marijuana, as well as any other drugs not prescribed for the athlete.

* Percentages represent amount of contests lost due to a positive drug test.

3.3 Counseling

Counseling is required for each student-athlete whose drug test is positive. Counseling, especially for drug related problems, is coordinated by the Substance Abuse Committee. Counseling continues until the counselor releases the student-athlete. Failure to attend could result in further loss of competitions. If continued counseling is recommended, various counseling options are available. Mental health professionals are utilized.

Under no circumstances will the counselor release information without prior consent of the student-athlete. The counselor only reports to the Substance Abuse Committee if the student-athlete does not attend the counseling sessions. Counseling is also available to any student-athlete who feels it would be beneficial.

3.4 Appeal Process

If a student-athlete believes the facts on which the Substance Abuse Committee’s decision is based are erroneous or that the sanction(s) should not be imposed, the student-athlete may file a written appeal with the Director of Athletics within 15 days after receipt of the letter from the Chair of the Committee notifying the student-athlete of the Committee’s action. The appeal must include any information which might change the factual findings of the
Committee or the sanction(s) if the Director of Athletics believes a basis exists for the appeal. The Director of Athletics shall make the final decision regarding the appeal and will notify the student-athlete in writing of the decision.

IMPORTANT NOTE: In cases where a student-athlete is deemed to have a positive drug test and such test results in sanctions affecting his or her ability to compete, and the student-athlete is scheduled to engage in competition before a determination can be made by the Substance Abuse Committee or the conclusion of any appeal under the standard review and appeal procedures, the student-athlete will be suspended from that competition pending a final decision. Time permitting, the student-athlete can request an expedited meeting of the Substance Abuse Committee and an expedited appeal to the Director of Athletics. The appeal must include any information which might change the factual findings of the Committee or the sanction(s). By selecting the expedited process, the student-athlete waives the right to the standard review and appeal procedures. Under the expedited process, the Committee will meet, by telephone if not in person, and in consultation with the Director of Athletics will render a decision before the competition. If the Committee is unable to meet or the Director of Athletics cannot render a decision before the competition, the student-athlete will not be permitted to participate in the competition.

3.5 Penalties and Requirements When Failing to Pass a Drug Test

The Substance Abuse Committee believes that it is in the best health interest of student-athletes to follow these policies and adhere to the rules outlined regarding drug use. However, in those cases where individuals engage in drug behaviors that violate the rules set forth, it is important that there is a clear understanding of the potential consequences. These are outlined in the following sections which describe procedures that will be implemented when a student-athlete is placed in Phase 1, 2, 3, or 4. The charts in Table 3 (see Section 3.2.3) and Table 4 (see Section 3.2.4) summarize the penalties for positive tests.

“A positive is a positive.” Defenses such as passive inhalation or being in the company of people who are smoking marijuana will not be accepted by the Committee. If an athlete tests positive for a prescription medicine, it will be considered a positive unless the athlete has a doctor’s prescription in his or her own name. The Committee will not accept the excuse for a positive that “someone else put something in my drink.”

The Substance Abuse Committee cannot determine how a student-athlete became positive for a drug. The Committee recommends to all student-athletes that they be careful of their association with people that are involved with drug use.

3.5.1 Phase 1 Recommended Guidelines (First Positive for Marijuana)

A. The student-athlete meets with the Substance Abuse Committee, and if the positive test is upheld, the student-athlete is to be suspended immediately from competition.

1. The length of the suspension is equal to 10% of the team’s season competition schedule where the student-athlete represents Virginia Tech (for the number of events, please see Section 3.2.4, Table 4). The suspended events will be the next consecutive events in the schedule. Post-season events are also included in the suspension (e.g. Conference Championships, NCAA Championships, Bowl Games, Post Season Invitational events). The suspension includes not allowing an athlete to dress for a game, be in the team area, and/or attend a pre-game meal.
B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:

1. Student-athlete and his or her parent or guardian
2. Head Coach
3. Associate Athletics Director for that sport
4. Counselor
5. Director of Athletics

C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.

D. Counseling is mandatory and attendance will be monitored by the Substance Abuse Committee. The student-athlete must attend a counseling session within two weeks of the meeting with the Substance Abuse Committee (allowances can be made when there is a conflict with the University Calendar). If the student-athlete fails to attend this meeting or subsequent sessions, there can be an additional 10% game suspension assessed by the Substance Abuse Committee.

E. Follow-up drug testing may occur over a period of six months.

F. If a team completes its competition schedule while a student-athlete is under Phase 1 sanctions, the student-athlete’s suspension will be carried over into the next season’s competition. If an individual tests positive during a red shirt year, the student’s suspension will begin during next season’s competition (i.e., game suspension will not be applied during a red shirt season or during a medical hardship).

G. When a student-athlete tests positive for marijuana outside the traditional playing season special dispensation will be considered. The opportunity to suspend the penalty phase will be considered by a sub-committee reporting to the Substance Abuse Committee. The sub-committee will consist of: the Team Physician, department Sport Psychologist, and Addiction Medicine specialist. After the student completes counseling sessions with each professional, the sub-committee will recommend to the whole Substance Abuse Committee whether that student is a candidate for the suspension of penalty phase 1.

If it is determined by the Substance Abuse Committee to offer the student the option to suspend penalty phase 1, the student will still be required to follow through on steps B through E described above.

Items for consideration when determining the option to suspend phase 1 penalty:

1. The student must be in the non-traditional segment of their primary sport and at least 60 days from the start of the pre-season practice segment of the traditional playing season.
2. This option cannot be used if the student-athlete has self-reported previously. Likewise, a student-athlete cannot self-report after having used this option.
3. If the student ever tests positive again he or she will serve both penalty phases 1 and 2 consecutively.

3.5.2 Phase 2 Recommended Guidelines

A. The student-athlete meets with the Substance Abuse Committee, and if the positive test is upheld, the student-athlete is to be suspended immediately from competition.

1. The length of the suspension is equal to 33% of the team’s season competition schedule where the student-athlete represents Virginia Tech. The suspended events will be the next consecutive events in the schedule. Post season events are also included in the suspension (e.g. Conference Championships, NCAA
Championships, Bowl Games, and Post Season Invitational events). The suspension includes not allowing an athlete to dress for a game, be in the team area, and/or attend a pre-game meal.

B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:

1. Student-athlete and his or her parent or guardian
2. Head Coach
3. Associate Athletics Director for that sport
4. Counselor
5. Director of Athletics

C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.

D. Counseling is mandatory and attendance will be monitored by the Substance Abuse Committee. The student-athlete must attend a counseling session within two weeks of the meeting with the Substance Abuse Committee (allowances can be made when there is a conflict with the University Calendar). If the student-athlete fails to attend this meeting or subsequent sessions, there can be an additional 10% game suspension assessed by the Substance Abuse Committee.

E. Follow-up drug testing may occur over a period of six months.

F. If a team completes its competition schedule while a student-athlete is under Phase 2 sanctions, the student-athlete’s suspension will be carried over into the next season’s competition. If an individual tests positive during a red shirt year, the student’s suspension will begin during next season’s competition (i.e. game suspension will not be applied during a red shirt season or during a medical hardship).

PLEASE NOTE: When an athlete tests positive for the first time and the sample contains more than one drug, the more severe sanctions will be applied.

3.5.3 Phase 3 Recommended Guidelines

A. The student-athlete meets with the Substance Abuse Committee, and if the positive test is upheld, the student-athlete is to be suspended immediately from competition.

1. The length of the suspension is equal to one calendar year from the finding of a positive drug test. The suspended events will be the next consecutive events in the schedule. Post-season events are also included in the suspension (e.g. Conference Championships, NCAA Championships, Bowl Games, Post Season Invitational events).

2. The student-athlete will be charged with the loss of one season of competition; a red shirt season or medical hardship cannot be used to substitute for the loss of the season of competition.
B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:

1. Student-athlete and his or her parent or guardian
2. Head Coach
3. Associate Athletics Director for that sport
4. Counselor
5. Director of Athletics

C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.

D. Counseling is mandatory and attendance will be monitored by the Substance Abuse Committee. An assessment will be made to determine the student-athlete’s desire for more aggressive treatment.

E. Follow-up drug testing will be mandatory.

F. If a team completes its competition schedule while a student-athlete is under Phase 3 sanctions, the student-athlete’s suspension will be carried over into the next season’s competition. If an individual tests positive during a red shirt year, the student’s suspension will begin during next season’s competition (i.e., game suspension will not be applied during a red shirt season or during a medical hardship).

### 3.5.4 Phase 4 Recommended Guidelines

A. The student-athlete is immediately suspended and the Department of Athletics revokes all privileges of participating in athletic activities or of using athletic facilities.

B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:

1. Student-athlete and his or her parent or guardian
2. Head Coach
3. Associate Athletic Director for that sport
4. Counselor
5. Director of Athletics

C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.

D. Follow up drug testing may be mandatory.

E. Evaluation for further services will be conducted by the Substance Abuse Committee. Further counseling and/or treatment sessions may be required for the student-athlete on an individual basis, including the possibility of inpatient treatment.

1. The offer to coordinate inpatient or outpatient treatment will be extended to the student-athlete under the clinical supervision of the Department of Athletics. “Clinical supervision” means that in some cases an alternative treatment is preferable to or needs to precede inpatient treatment. In these cases, the treatment is supervised by appropriate Athletic Department medical or mental health professionals.

F. Financial aid will not be renewed beyond the term of the current financial aid contract.
3.6 Other Positive Drug Tests

Documentation of a “positive” drug test from a recognized National or International Sports Governing Body will be considered as a “positive” drug test performed by our laboratory and will place the student-athlete in the appropriate phase. If a student-athlete has tested “positive” for drugs by the NCAA, he or she must abide by the NCAA policy. The NCAA requires a one calendar year minimum suspension. If a student-athlete transfers, an NCAA positive test result must be reported to the new school. A positive drug test by the NCAA will also be treated as a positive drug test by the Department of Athletics. The NCAA sanction and the departmental sanction will be imposed at the same time. The more severe sanction of the two will be enforced.

3.7 Self-Report Referrals

A student-athlete who voluntarily approaches the Athletics Director or Sport Administrator for help with his or her drug problem, prior to a University request for the student-athlete to be available for testing, will be accorded confidentiality and professional help. A voluntary request for assistance will result in therapeutic treatment without loss of scholarship aid or participation on the team provided the student-athlete agrees to the terms of his or her rehabilitation.

An athlete who voluntarily asks for assistance but does not follow the terms of his or her rehabilitation will be sanctioned according to post-test procedures for positive results. A student will serve both penalty phases if a second positive occurs in any future testing.

Drug usage by a Virginia Tech student-athlete which is discovered independently by University authorities will be subject to the drug policy as outlined herein.

4. Definitions

Substance Abuse Committee: Appointed by the Virginia Tech Director of Athletics, the Committee is responsible for implementing all drug testing policies.

5. References
